Habitat Management for Invertebrates

**When**
Friday 27th November 2015
10am to 4pm

**Where**
Woods Mill, Henfield

**Cost**
£95 Non-Members
£75 Members

**Description**
Managing for invertebrates often requires only subtle changes but these small changes can have huge impacts on tiny organisms. This course would be suitable for people wanting to manage a nature reserve OR a garden better for invertebrates.

**What we’ll do**
You will learn: basic principles of how to better manage for invertebrates and how to recognise good and badly managed sites/areas for invertebrates. There will be a case study of deadwood invertebrates, a focus on woodland, grassland and heathland invertebrates and a walk around Woods Mill, commenting on what you have learned throughout the day.

**The tutor**
Graeme Lyons is the Senior Ecologist for Sussex Wildlife Trust where he also runs a number of identification and training courses. He has recently taken on the role of chairman for Sussex Moth Group and also does a small amount of freelance ecological consultancy. His main areas of interest are birds, plants and invertebrates and a lot of his spare time is spent in the field.

**What to bring**
Packed lunch and refreshments.
Pack appropriate clothing and footwear for the season.

**Getting there**
Woods Mill, Shoreham Road, Henfield
BN5 9SD
1.5 miles south of Henfield village on the A2037, 0.5 miles north of Small Dole.

Compass bus 100 stops at Woods Mill.

**Suitability and other info**
This course is designed primarily for adults. To manage nature reserves or gardens better for invertebrates.

**Please notify us if you have any medical conditions or mobility issues that may affect your ability to attend the course.**
